Profile

Dedicated and innovative junior software developer with a passion for building and maintaining applications. Skilled in some frontend languages, like JavaScript, Vue.js and PHP for backend. Seeking to take part and contribute in any dynamic software development team.

Projects

Gadget Galaxy(Vue)

Created a dynamic website using Vue.js where you can buy all electronic products and accessories.

Features:

- Product listing with images, descriptions, and prices.
- User authentication and authorization for secure access.
- Shopping cart functionality with the ability to add/remove items.
- Integration with a backend API for product data and user authentication.
- Responsive design for optimal viewing on desktop and mobile devices.

Car Services Booking(Laravel)

Developed a car services booking website where car owners book the services they need from the mechanics.

Features:

- Services selection according to possible car faults.
- User identification by registration.
- Description input describing the car model.

- Success message after successful booking of the service.

Currency Converter(Vue.js)

Developed a currency converter website for converting currencies to the currency of your interest.

Features:

- Input box to enter the amount you require to know the conversion.
- Drop down menu to select the currency you entered and the desired currency to be converted to.
- A display to return your conversion total amount in your desired currency.

Professional experience

BENKIKO DAO (January 2024 – September 2024)

FRONTEND DEVELOPER

- **Developed responsive web applications:**
Designed and implemented responsive web applications using Vue.js, ensuring optimal performance across various devices and screen sizes.
- **Component based architecture:**
Utilized Vue.js to build reusable and modular components, enhancing maintainability and scalability of the codebase.
- **Api integration:**
Integrated RESTful APIs to dynamically fetch and display data, ensuring seamless communication between the frontend and backend services.
- **Performance optimization:**
Optimized frontend performance by implementing lazy loading, code splitting, and other best practices to enhance user experience.
- **Collaboration and version control:**
Collaborated with cross-functional teams using version control systems like Git to manage codebases and streamline development workflows.

KUNTA COGNIILABS (September 2024 – Present)

FRONTEND DEVELOPER

- **Visualized Web Designs:** Created visually appealing and interactive web designs using Vue.js and TypeScript, focusing on user experience and accessibility.

- **Clean Architecture Implementation:** Employed clean architecture principles to structure projects for better maintainability and scalability, allowing for easier onboarding of new team members and more efficient project management.
- **Collaboration:** Worked closely with designers, backend developers, and project managers to ensure cohesive and efficient project execution, facilitating regular feedback loops and iterative improvements.
- **Continuous Learning:** Actively engaged in professional development opportunities, staying up to date with the latest trends and technologies in frontend development to enhance skill sets and apply new knowledge to projects.

Skills

Frontend Frameworks and Libraries:

Experience in working with frontend frameworks such as Vue.js, and integrating third-party libraries to enhance functionality and user interface

HTML/CSS

- Proficient in creating and styling web applications using HTML5 and CSS3, ensuring cross-browser compatibility and responsive design for optimal user experience.
- Experienced in crafting responsive and visually appealing designs using CSS3, including modern layout techniques like Flexbox and Grid.

JavaScript

- Strong programming skills in JavaScript, including ES6+ features. Experience in developing interactive and dynamic web interfaces, utilizing popular frameworks and libraries.
- Experienced in asynchronous programming using Promises, async/await, and AJAX for efficient data handling

Vue.js

- Expertise in building modern, reactive user interfaces with Vue.js, leveraging its core features such as components, directives, and the Vue Router for single-page applications.
- Skilled in integrating third-party libraries and APIs within the Vue.js ecosystem.
- Experience in performance optimization techniques such as lazy loading, code splitting, and component caching.

Backend Development:

Laravel

- Competent in developing RESTful APIs and server-side logic using Laravel, adhering to MVC architecture principles.
- Experienced in managing database operations using Eloquent ORM, database and migrations for efficient data handling.
- Proficient in Laravel's built-in tools for authentication

- to build secure web applications.

Version Control

- Proficient in using version control systems like Git to collaborate with team members, manage code, and track changes during development.

Time Management

- Strong organizational skills with the ability to prioritize tasks and manage time effectively in fast-paced environments.

Testing and Debugging

- Experience in debugging and testing frontend and backend code to identify and fix errors, ensuring the application functions smoothly and meets quality standards.
